DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27-30, drawn to methods for making electrophoretic displays, classified in class 345/107.
- II. Claims 23-26, drawn to electrophoretic displays, classified in class 359, subclass 265.

1. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, each of the electrophoretic displays claimed can be made with an adhesive with a percent by volume other than 10.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. A telephone call was made to G. Gregory Schivley on 07/07/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2873

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
